WHO WE ARE:

Imperial Coat, a family-run business, specializes in manufacturing high-quality Lime Plaster decorative coats and texture paint. Distinguished by our hands-on approach and unwavering passion, we stand out in the industry. Comprising a team of perfectionists, we take immense pride in delivering our best efforts in every project. Offering a comprehensive service, we handle the entire supply and application process from start to finish.

URBAN CONCRETE EFFECT (TIMELESS EFFECT)

The Urban Concrete Effect, also known as the Timeless Effect, is a decorative finish that replicates the texture and appearance of concrete. This effect is considered timeless, as it can complement a variety of design styles and is particularly well-suited for both raw industrial spaces and modern rooms. The goal of the Urban Concrete Effect is to achieve a balance between elegance and rawness within interior and exterior spaces.

URBAN CONCRETE (STUCCO EFFECT)

Urban Concrete Stucco Effect, a seamless fusion of a satin-smooth texture and the captivating depth of penetrating grey. This combination imparts a subtle finesse to even the most contemporary spaces. Ideal for mimicking the aesthetic of shuttering boards, our Urban Concrete Stucco Effect brings a modern touch to surfaces, offering a sophisticated finish that resonates with elegance and style.

CONCRETE RUTTED EFFECT (TIMELESS EFFECT)

The Concrete Rutt Effect is a decorative finish designed to replicate the distinctive characteristics of concrete, specifically emphasizing a rough texture. This effect aims to imitate the structure of concrete with a focus on creating a visually appealing and porous surface. The application process plays a crucial role in achieving various decorative effects, and the outcome can range from subtle textures to more pronounced and rugged appearances.

TRAVERTINE (DELUXE EFFECT)

The Travertine Deluxe Effect is a versatile and aesthetically pleasing decorative solution suitable for both private and public spaces. This effect is achieved through the use of natural lime bonding and marble dust applied to the surface of the wall. The combination of these materials creates unique markings that closely mimic the appearance of natural Travertine stone.

TRAVERTINE (ROUGH EFFECT)

The Travertine Rough Effect is a notable decorative solution characterized by a distinct structure and high porosity. Designed for application in both private and public spaces, this effect involves the use of natural lime bonding and other additives on the wall's surface, resulting in unique markings that convincingly imitate the appearance of natural Travertine stone.

RUST EFFECT

The Rust Effect is an original decorative coating designed to imitate the appearance of rust. This unique finish is particularly well-suited for modern interiors, adding an industrial and weathered aesthetic to surfaces. The term "rust" suggests a sense of decay or deterioration, which is precisely what this effect aims to replicate in a controlled and artistic manner.

NORWAY EFFECT

The Norway Effect is a distinctive decorative finish characterized by a single-layer structural paint that imparts the exquisite and pleasant appearance of velvet. This effect is achieved through a unique formulation, resulting in a surface with a subtle and luxurious character. The versatility of the Norway effect makes it suitable for application in spaces designed for both work and leisure.

STUCKO (ANTIQUÉ EFFECT)

The Stucko Antique Effect is a decorative coating designed to replicate the appearance of old decorative techniques, particularly those associated with traditional Venetian and lime Stucco. This effect is achieved by applying a special coating that results in a smooth, pleasant-to-touch surface. The Venetian Stucco Antique Effect imparts an exclusive and individual character to interiors, evoking a sense of timeless elegance and craftsmanship.

RENAISSANCE

Elevating elegance with a Renaissance-inspired decorative texture, where history meets artistry in every brushstroke and intricate detail. A timeless masterpiece on our walls.

VELLUTO (VELVET EFFECT)

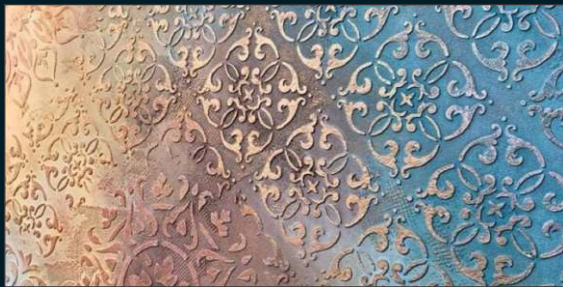

The Velluto Effect is a decorative coating that offers a combination of pearl and velvet characteristics. This unique finish is designed to create a smooth and pleasant-to-touch surface, providing an exclusive and individual character to interiors.

STENCIL EFFECT

Crafting timeless tales on walls, stencil lime plaster whispers stories of artistry, where patterns meet plaster in a dance of elegance, leaving a legacy of sophistication and style.
